

AF3664HE brand

66 DAYS

- Very high yielding ExpressSun® hybrid
- Superb oil content and shorter stature plant type
- Black oil seed well suited for bird seed market
- Very solid agronomic package to fit the western environment

END USE MARKETS: DeHull, BirdSeed, High Oleic, ExpressSun®

CHARACTERISTICS

HERBICIDE TOLERANCE	ExpressSun®	MATURITY	Medium
PLANT HEIGHT	Medium Short	GRAIN COLOR	Black
TEST WEIGHT	2	OIL CONTENT	2
YIELD	1		

PLANTING

EMERGENCE	N/A
DROUGHT TOLERANCE	2
DRYDOWN	4
ROOT LODGING	2
STALK LODGING	2
STALK STRENGTH	2
ROOT STRENGTH	2

MANAGEMENT RECOMMENDATIONS

DOWNY MILDEW	2
PHOMOPSIS	2
HEAD SCLEROTINIA	2
ROOT SCLEROTINIA	2

IMPORTANT: Characteristic scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by AgVenture, Inc.. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.

ExpressSun® herbicide tolerant trait sunflower hybrids with the ExpressSun® trait for resistance to tribenuron-methyl herbicides labeled for use with the ExpressSun trait. This unique sunflower system is designed to maximize weed control in sunflower crops, enhancing ease of production and yield. This system provides improved weed control over conventional hybrids with traditional herbicides.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

Components of LumiGEN® seed treatments are applied at a Corteva Agriscience production facility, or by an independent sales representative of Corteva Agriscience or its affiliates. Not all sales representatives offer treatment services, and costs and other charges may vary. See your sales representative for details. Seed applied technologies exclusive to Corteva Agriscience and its affiliates.
